EXPERIENCE

Norm Powell is senior vice president of Business Services for Savannah River Nuclear Solutions (SRNS) at the U.S. Department of Energy's (DOE) Savannah River Site (SRS). In this role he is responsible for Contracts and Supply Chain Management, Finance, Information Technology, Business Planning and Integration, and Enterprise Systems Solutions.

Powell has 38 years of experience in engineering, procurement and construction of major international and domestic projects for Fluor Corporation, where most recently he served for four years as vice president of Federal Cost and Pricing for Fluor, with responsibility for audit response, incurred cost rate preparation and final negotiations. Prior to that, he was vice president of Material Management for Fluor Government Group for two years. His responsibilities with the 2,000-person acquisition organization included material management, subcontracts, prime contracts, export control and small business.

He spent six years at Hanford as the vice president of business services where his responsibilities included finance, supply chain operations, information technology and prime contract administration. He also served as general manager of a 450-person engineering office, providing support to Hanford's nuclear projects and support to Fluor Federal Projects.

Powell previously served as the SRNS vice president of Site Integration from 2008-2009, where his responsibilities included developing the site interface plan and maintaining relationships with other site contractors. Additionally, he led planning and integration of projects and operations, project controls, and the site-wide performance measurement system including risk identification, estimating standards and work authorization. He also had responsibility for the development, implementation and oversight of the site's integrated project team.

During his career, Powell has provided business support to over 1,500 commercial and government projects in 13 countries.
