EXPERIENCE

Freddie Grimm is the Senior Vice President of Strategic Planning and Integration for Savannah River Nuclear Solutions (SRNS) at the U.S. Department of Energy's Savannah River Site (SRS) near Aiken, S.C. His responsibility in this role is to assist in adapting to changing priorities and provide direction to several high-level initiatives, including landlord transition and the development of a master campus plan for SRS.

Prior to his current assignment, Grimm served as the Director for Business Planning and Integration, responsible for SRNS Project Controls, Risk Management, Continuous Improvement, Program Integration and other strategic initiatives.

Grimm also served as the Savannah River National Laboratory (SRNL) Facility Maintenance Manager, the SRNL Facility Manager and as the Deputy Manager and Program Integration Manager for the Research Operations Department. He was the Engineering Department Manager for the Facility Support Services Division which provided engineering, waste and environmental, and project management services for SRNL as well as the SRS Central Analytical Laboratory. Grimm also served as the SRNL Chief Engineer. Most recently, he served as the Director of Research Operations for SRNL, where he had overall leadership responsibility for all nuclear as well as non-nuclear laboratory operations.

Grimm began his career in the SRS utility and production nuclear reactor programs where he served as a manager in the engineering and maintenance organizations.

He currently serves on the Board of Directors for North Augusta Forward and on the North Carolina State University Nuclear Engineering Undergraduate Advisory Board.
