

# Environmental Policy Statement

## SRNS is dedicated to protecting the environment

- Our commitment is deeply **personal**, driven by a shared responsibility to safeguard our co-workers, community, families and future generations.
- Our commitment is **patriotic**, rooted in support of our national security mission.
- Our commitment is **conservation-focused**, ensuring the preservation and longevity of our natural, biological, and cultural resources.

At SRNS, we approach our environmental responsibilities with a focus on continuous improvement. Senior leaders set measurable goals, monitor performance, and assess our impact, ensuring proactive actions are taken to strengthen our environmental outcomes.

Every SRNS employee contributes to our environmental stewardship by incorporating best practices and pollution prevention strategies into their work plans and processes. We emphasize safe operations and responsible management practices to reduce environmental impacts wherever possible and maintain full compliance with applicable regulations and requirements.

SRNS further strengthens its commitment by engaging with stakeholders and the community to ensure transparency and collaboration regarding our environmental efforts. We work in partnership with the National Nuclear Security Administration - Savannah River Field Office and Department of Energy-Savannah River Operations Office, as well as our local, state, and federal partners to consistently meet or exceed environmental obligations and Department of Energy directives. Through active community involvement and strong collaboration with our partners, we remain accountable to the communities we serve to preserve the resources entrusted to us.

**Duane McLane**  
Senior Vice President  
Environment, Safety, Health and Quality  
Savannah River Nuclear Solutions, LLC
