FOR IMMEDIATE RELEASE

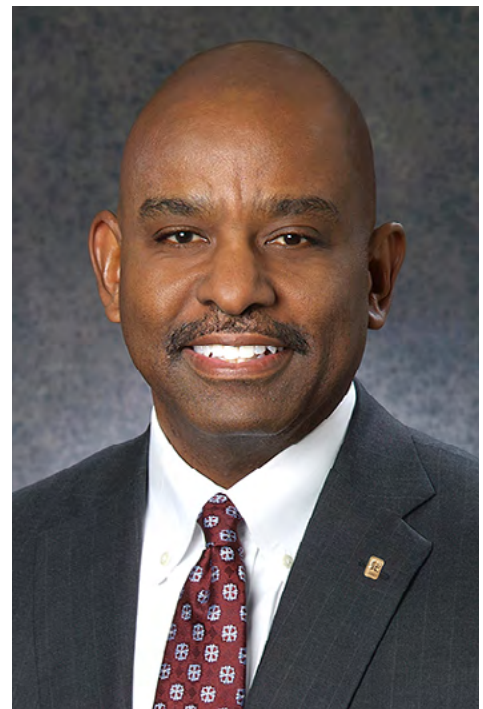

SRNS' Dwayne Wilson Recognized by National Safety Council in 2014 CEOs Who "Get It"

AIKEN, S.C. (January 21, 2014) – The National Safety Council has announced the 2014 CEOs Who "Get It;" the organization's annual recognition of leaders from across the country who demonstrate world-class safety leadership. Among the 10 distinguished CEO's recognized is Dwayne Wilson, President and CEO of Savannah River Nuclear Solutions, LLC (SRNS), the primary contractor at the Department of Energy's Savannah River Site.

Wilson was selected based on his leadership and commitment to safe operations as President and CEO of SRNS. Since 2012, he has built a robust safety and security campaign for both his company and all contractors at the Savannah River Site (SRS). The campaign, known as "Safety and Security Begins with Me," has unified all employees around a common goal – to make safety and security a personal value in their daily lives, both on and off the job.

The qualifications to receive this national safety recognition include four common elements: committed leadership and employee engagement, sound safety procedures, continuous risk reduction, and measuring and improving performance. These factors form the basis of the Council's "Journey to Safety Excellence" approach – a consistent quest to drive workplace injuries to zero.

"Though I am honored to receive recognition from the National Safety Council, it is our employees conducting highly technical work every day, who are the true reasons we have achieved a world-class safety rating, I share this honor with each of them," said Wilson.

The National Safety Council has named SRNS President and CEO Dwayne Wilson as one of this year's CEOs Who "Get It." Wilson was selected based on his leadership and commitment to safe operations, having built a robust safety and security campaign for both his company and all contractors at the Savannah River Site.

This year's roster of 10 top executives represents national and multinational organizations of all varieties and sizes. Profiles of the CEOs Who "Get It" will be featured in the February 2014 issue of "Safety+Health" magazine.

"The Council is honored to recognize such strong examples of safety leadership in this year's group of CEOs Who 'Get It,'" said Jim Johnson, Vice President, Workplace Safety Initiatives. "We hope other leaders follow suit with a steadfast dedication to the journey."

The National Safety Council was founded in 1913 and chartered by Congress. The nonprofit organization's mission is to save lives by preventing injury and death at work, in homes, communities, and on the road through leadership, research, education and advocacy.

Savannah River Nuclear Solutions is a Fluor-led company whose members are Fluor Federal Services, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy's Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
