FOR IMMEDIATE RELEASE

Savannah River Nuclear Solutions Recognized by the American Heart Association for Commitments to Workforce Well-being

Awarded Gold Level Recognition for the Association's 2022 Workforce Well-being Scorecard™

AIKEN, S.C., -- (April 17, 2023) The American Heart Association has awarded Savannah River Nuclear Solutions (SRNS) Gold level recognition for its commitments to employee health and well-being as measured in the Association's 2022 [Workforce Well-being Scorecard™](#).

The Scorecard evaluates factors such as mental health policies, organizational well-being strategies to address burnout, health equity measures and employee financial resources to provide a comprehensive assessment of an organization's culture of health. Three hundred eighty-one organizations completed the Scorecard in 2022, and all organizations were recognized with an achievement level of platinum (9%), gold (45%), silver (32%), bronze (9%) or completer (5%).

SRNS is the managing and operating contractor at the Department of Energy's Savannah River Site near Aiken, South Carolina, and employs approximately 6,000 people. "SRNS prioritizes the physical and mental safety of each employee," said Sean Alford, Executive Vice President and Chief Administrative Officer. "Our recent participation in this program and recognition of Gold status validates this commitment and we are thankful."

SRNS employees laced up their walking shoes for the 2023 CSRA American Heart Walk held at the SRP Park in North Augusta, South Carolina. SRNS employees raised over \$140,000 to improve cardiovascular health in the local community.

The American Heart Association has defined best practices for employers to use to build a culture of health and well-being for their workforce. Companies recognized at the Gold level have achieved a score of 183 - 216 out of a maximum 230 points.

The American Heart Association, a global force for healthier lives for all, developed the Workforce Well-being Scorecard in collaboration with top scientists and industry experts to reflect the latest evidence-based science on workforce health and well-being. First launched in 2016, the Scorecard was refreshed in 2022 to place a renewed focus on health equity and comprehensive organizational well-being. The free, web-based tool allows employers to regularly evaluate their health and well-being progress, identify areas of opportunity and see how their results stack up against their peers.

Research has shown that supporting the mental and physical well-being of employees is vital to driving productivity, engagement and successful business outcomes. By

investing in a culture of health in the workplace, organizations can improve employee retention and bolster their organizational reputation.[1]

“We are pleased to be recognized by the American Heart Association for our commitment to employee health and well-being and our continued efforts to promote equity,” said Stuart MacVean, SRNS President and CEO. “Our organization is dedicated to creating a culture that is safe, supportive and provides opportunities for everyone to reach their full

potential—in and out of the workplace.”

The Workforce Well-being Scorecard is a key component of the Association’s Well-being Works Better™ platform, which helps business leaders unleash the power

of a healthy, happy workforce. Distinct from traditional wellness programs, Well-being Works Better empowers employers to champion the mental and physical health of their employees and provides actionable guidance to meet the unique needs of their organization.
