FOR IMMEDIATE RELEASE

SRNS' Operations and Construction Divisions Recognized by South Carolina Manufacturers Alliance for Safety Excellence

AIKEN, S.C. – March 9, 2016 – Savannah River Nuclear Solutions (SRNS) was recently announced as a Safety Award winner by the South Carolina Manufacturers Alliance for excellence in safety performance during 2015.

Although the company has received numerous awards for safety excellence since becoming the Savannah River Site's management and operations contractor in 2008, they credit their unique approach to safety culture management as a key element to their safety performance successes.

"I am humbled by the external validations that SRNS receives for excellence in safety performance. This recognition from the South Carolina Manufacturers Alliance further supports that our people-focused approach to safety performance is not only the right way to conduct business, but absolutely critical to sustaining worker safety and addressing our mission to the Department of Energy," said Carol Johnson, SRNS President and CEO.

Employees install a banner along one of the Site's major roadways displaying the safety and security motto, which represents the safety culture at SRS.

Combined, SRNS' Operations and Construction divisions worked more than 9.6 million hours during the calendar year with four injuries that required a day-away from work in the operations division, while the construction division completed the year without a single lost time injury.

“We work in a high hazard environment where every job is viewed through a safety lens. When compared to similar work across our industry, it is clear that SRNS employees take their work seriously, not only for their own safety but the safety of their peers and the community,” said Johnson.

The company will receive formal recognition for their performance at the South Carolina Manufacturers Alliance Safety Summit on March 17, in Spartanburg, S.C.

For more than a century, the South Carolina Manufacturers Alliance has been the voice for manufacturing in South Carolina. As the state's preeminent industrial trade association, the SCMA is the single most effective advocate for advancing manufacturing in South Carolina.

Savannah River Nuclear Solutions is a Fluor-led company whose members are Fluor Federal Services, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy's Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
