FOR IMMEDIATE RELEASE

SRNS' Bob Bonnett Receives Fluor Corporate Award of Excellence

AIKEN, S.C. April 18, 2017, 2016 – Workplace safety is a serious matter at the Savannah River Site (SRS), for many it is a way of life - a culture built over many years of working in the federal nuclear industry. But for some, like Bob Bonnett, Savannah River Nuclear Solutions (SRNS), Senior Engineering Technical Support Specialist, workplace safety is motivation to go above-and-beyond the call of duty, an attribute that was recognized by Fluor Corporate, a SRNS parent company, who awarded Bonnett with a Health, Safety and Environmental (HSE) Corporate Award of Excellence.

“Fluor is one of the world’s largest engineering, construction and project management firms, with more than 60,000 employees world-wide. I am thrilled that one of the SRNS team members were selected as a recipient of a Fluor HSE Corporate Excellence award. This recognition speaks volumes about Bob Bonnett’s commitment to safety leadership. He has proven that he will go the extra mile to ensure he and his coworkers keep safety in the forefront of all that they do, while building a safety culture that is infectious to all who enter their work area,” said Stuart MacVean, SRNS President and CEO.

Bonnett has been employed at SRS for 8 years and credits his passion for safety to his love for his family and friends, and a strong sense of responsibility. “I am both shocked and delighted at having received the Fluor Corporate HSE Award of Excellence. I definitely have a passion for looking out for others, it is just who I am - ingrained in me by my parents who worked at SRS for more than 30 years,” said Bonnett. “I am truly honored to be nominated, but to win, well, that is pretty incredible.”

Bonnett was formally recognized by SRNS Senior Management on March 29 at a company safety forum.

Savannah River Nuclear Solutions is a Fluor-led company whose members are Fluor Federal Services, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy’s Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
