FOR IMMEDIATE RELEASE

SRNS' Operations and Construction Divisions Receive Safety Recognition from South Carolina Chamber of Commerce

AIKEN, S.C. April 3, 2017 – Savannah River Nuclear Solutions (SRNS) was presented awards from the South Carolina Chamber of Commerce for safety performance excellence at a banquet held in Columbia on March 30, 2017.

SRNS' Operations and Construction divisions were recognized for their commitment to conducting work safely during calendar year 2016. For a large company that conducts highly technical and hazardous work, the SRNS safety performance is considered to be "World Class" based on industry standards.

"Safety is an ingrained culture at SRS and our employees deserve all the credit for this award," said SRNS President and CEO, Stuart MacVean. "They demonstrate their dedication and personal accountability to safety every day."

Combined, the SRNS' Operations and Construction divisions worked more than 9.7 million hours during the calendar year with two injuries that required a day-away from work in the operations division, while the construction division completed the year without a single lost time injury. When compared to similar sized companies in industry, the SRNS safety culture rises to the top of the class.

"It is important for our community to understand why safety is so important to the SRNS workforce," said Kliss McNeel, SRNS Senior Vice President, Environmental Stewardship, Safety and Health. "Not only do our employees care about the safety of their teammates, but they

care about their families, neighbors and friends. They also hold in high-esteem the long-standing trust and support our community puts into them to deliver on our national missions, safely and securely.”

With more than 5,000 employees spanning more than 310-square miles, the award-winning team remains linked by a safety culture that spans more than 60-years and continues to gain momentum. “Infectious” was the word used by one SRNS employee to describe the SRNS safety culture. Barbara Guenveur, the SRNS Employee Engagement Liaison has worked at the Site for more than 30 years. “The energy and enthusiasm our team demonstrates every day, both on the job and in the community is infectious, it becomes a personal core value that is shared from generation to generation. We are proud of that.”

Savannah River Nuclear Solutions is a Fluor-led company whose members are Fluor Federal Services, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy’s Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
