SRNS Exceeds Small Business Contracting Goals in FY16

AIKEN, S.C. (Jan. 18, 2017) – Savannah River Nuclear Solutions (SRNS), the management and operating contractor for the Department of Energy’s Savannah River Site, has surpassed its small business contracting goals for fiscal year (FY) 2016.

SRNS awarded more than \$177 million to small businesses, which is 65 percent of all the funding it awarded, exceeding the company’s goal of placing 52 percent of all contract work with small businesses. The amount represents more than \$7 million above SRNS FY 2015 levels.

“We have a long history of working closely and supporting small businesses,” said Norm Powell, Senior Vice President of SRNS Business Services. “Not only are these contracts vital to the site in areas such as staff augmentation and construction support, but it also allows us to support and grow local businesses in our region.”

North Wind, a small business, helped SRNS treat groundwater plumes caused by historical operations at SRS using environmentally-friendly technologies. In FY 2017, North Wind will play a role in an environmental evaluation of the Lower Three Runs stream, which will ultimately support future remediation activities.

SRNS also awarded a contract to Hebbard Electric to replace circuit breaker switchgears. The small business has performed a variety of electrical contracting work across the site.

North Wind, a small business contractor for Savannah River Nuclear Solutions (SRNS), treats groundwater at the Savannah River Site in Aiken S.C. SRNS has surpassed its small business contracting goals for fiscal year 2016, awarding more than \$177 million to small businesses.
