SRNS Celebrates 10 Year Anniversary

AIKEN, S.C. (August 28, 2018) – Savannah River Nuclear Solutions (SRNS) recently celebrated its 10 year anniversary as the Savannah River Site (SRS) management and operations (M&O) contractor, highlighting its many past and present successes.

All SRNS employees were invited to celebrations where managers from across the company discussed significant achievements in safety performance throughout the past 10 years. These achievements include surpassing 10 million Safe Hours on three occasions; receiving 121 safety awards and recognitions from national, regional and local organizations; and SRNS' safety performance being sustained with nearly 40 percent of its workforce being hired since 2008. SRNS also celebrated recently surpassing 15 million safe hours.

“Our safety culture is driven by the SRNS workforce and it exemplifies this team’s commitment and compassion. I am proud to work with each of you, congratulations on a job well-done, and keep up the momentum,” said SRNS President and CEO Stuart MacVean.

As the M&O contractor, SRNS is making the world safer by developing innovative approaches to environmental stewardship and nuclear materials challenges; supplying tritium for our country’s nuclear weapons deterrent; securing nuclear materials to prevent unwanted proliferation; and transforming nuclear materials into assets and stable wasteforms.

Savannah River Nuclear Solutions, a Fluor-led company with Newport News Nuclear and Honeywell, is responsible for the management and operations of the Department of Energy’s Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
