**FOR IMMEDIATE RELEASE**

## National Safety Council Recognizes SRNS for Safety Excellence with Two Awards

AIKEN, S.C. (August 26) – Savannah River Nuclear Solutions (SRNS) was recently recognized by the National Safety Council (NSC) for achieving 25 Million safe-work hours without a lost work day due to an on-the-job injury; the team was also awarded the NSC Industry Leader Award for their exemplary safety performance in comparison to similar companies in the same industry.

On June 6, SRNS achieved a company record-setting milestone of 25 Million safe-work hours. This record represents the work of more than 6,500 employees working in diverse organizations across the Savannah River Site (SRS). The management and operations contractor at SRS continued to grow their company record, exceeding more than 27 Million safe-work hours in July.

In recognition for the team's safety achievement, SRNS was awarded the NSC "25 Million Safe Hour" award.

The NSC also recognized SRNS with a 2019 Industry Leader Award. This award benchmarks outstanding safety achievements among member companies, recognizing the top 5 percent of companies, units and facilities that have met extensive criteria and who have qualified for the NSC 2019 Occupational Excellence Achievement Award, which SRNS recently won in May for the eleventh consecutive year.

"I am really pleased that the 6,500 SRNS employees are being recognized for their efforts to keep one-another safe," said Stuart MacVean,

SRNS was recently recognized with two safety performance awards from the National Safety Council.
