## Stuart MacVean Recognized as 2020 National Safety Council's CEOs Who "Get It"

AIKEN, S.C., January 28, 2020 – Stuart MacVean, Savannah River Nuclear Solutions (SRNS) president and CEO, was recognized by the National Safety Council (NSC) as a 2020 CEOs Who "Get It." The NSC's recognition is bestowed to a small number of CEO's from companies worldwide who go the extra mile to protect employees both on-and-off the job.

Since becoming SRNS' president and CEO in 2016, MacVean has actively led a portfolio of safety and health programs designed to modernize and enhance the safety culture, wellness and training at SRNS and in the community.

MacVean has addressed the generational shift at SRS by leading enhancements to onboarding and mentoring programs to accelerate hiring and training in support of vital Site missions. His vision led to the creation of a new program that provides direct access to SRNS senior leaders who teach training modules for employees after 90-days of joining the company. The program allows new employees to get a broader understanding of company expectations and the safety culture that makes SRS one of the safest industrial sites in the world.

In 2019, MacVean led the SRNS workforce to a new company safety record, exceeding 25 Million safe-work hours without a lost work day due to an on-the-job injury.

“One of Stuart’s most recognizable character traits is his authentic concern for worker safety and health. He takes safety personally and goes the extra mile to inspire employee ownership for safety performance while also bolstering hazard recognition and control mechanisms in work package development,” said Rick Sprague, Senior Vice President, Environmental, Safety, Health and Quality.

The February issue of NSC’s Safety+Health magazine will feature MacVean and the 8 other national and international recipients of the 2020 CEO’s Who “Get It” title.

The National Safety Council (nsc.org) is a nonprofit organization whose mission is to eliminate preventable deaths at work, in homes and communities, and on the road through leadership, research, education and advocacy. Founded in 1913 and chartered by Congress, NSC advances this mission by partnering with businesses, government agencies, elected officials and the public in areas where we can make the most impact.

*Savannah River Nuclear Solutions, a Fluor-led company with Newport News Nuclear and Honeywell, is responsible for the management and operations of the Department of Energy’s Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.*
